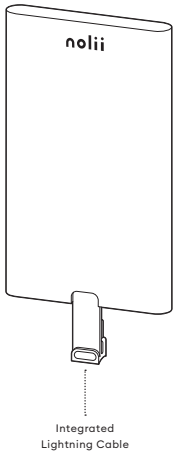
Couple Battery with Integrated Lightning Cable



Instructions for Use
To attach your Couple Battery to Couple Case, follow the illustrations on the back of this booklet.

The battery functions using a touch button indicated on the illustration. It serves as both an 'on' button and a battery charge level check.

Charging Couple Battery
- Insert the USB-C end of the cable into Couple Battery and insert the USB-A end of the cable into a power source
- LEDs will flash until Couple Battery is fully charged at which point all 4 LEDs will stay on until the USB-C cable is disconnected

Charging your Device
- Push down the cable head and then slide out the cable from the bottom of the battery
- Attach Couple Battery to your Couple Case
- Insert the cable's Lightning connector into your phone's Lightning port
- Press the touch button on the bottom of the battery to begin charging
- LEDs are lit for duration of charge, indicating Couple Battery's remaining charge

Turning the Battery Off
- Simply unplug the cable from your phone and the battery will switch off after 20 seconds
- Couple Battery will automatically turn off once your phone battery reaches full capacity

Checking Couple Battery Charge Level
- When unplugged from your phone, press the touch button on the bottom of the battery
- LEDs are lit for duration of charging, indicating Couple Battery's remaining charge
- The LEDs will indicate the level of charge (see diagram on previous page)
