

## Key Features

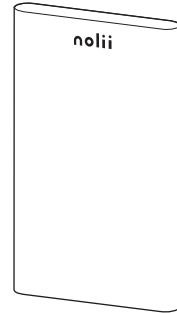

## Pairing with Couple Case\*

## Charging your iPhone

\*Couple Case sold separately

## Couple Battery Wireless

### Instructions for Use

To attach your Couple Battery to Couple Case, follow the illustrations on the back of this booklet.

The battery functions using a touch button indicated on the illustration. It serves as both an 'on' button and a battery charge level check. Couple Battery can also charge compatible devices via the USB-C port, which functions as both an input and output. Please note, you can continue to use your headphone jack whilst the phone is charging.

### Charging Couple Battery

- Insert the USB-C end of the cable into Couple Battery and insert the USB-A end of the cable into a power source
- LEDs will flash until Couple Battery is fully charged

### Charging your Device

- Attach Couple Battery to your Couple Case
- Press the touch button on the bottom of the battery to begin charging
- LEDs are lit for duration of charge, indicating Couple Battery's remaining charge

### Turning the Battery Off

- Couple Battery will automatically turn off after 20 seconds, once your phone battery reaches full capacity
- Once you remove Couple Battery from Couple Case, it will automatically turn off after 20 seconds

### Checking Couple Battery Charge Level

- Press the touch button on the bottom of the battery
- The LEDs will indicate the level of charge remaining in the battery (see diagram on previous page)
- After 20 seconds, the lights will switch off
